

Geography

Our main learning this half term will be focusing on our world. Focusing on physical geography, we will begin by using geographical enquiries, reading maps and then considering where places are in the world and how they differ.

History

This term, we are focusing on local history and chronology using timelines.

Physical Education

Focusing on developing our dance skills, children will learn choreography to Mary Poppins' supercalifragilisticexpialidocious and incorporate props into their dance!

PSHE (Personal, Social and Health Education)

Topics for this term include: Sun safety, Keeping safe in the community, Stranger Danger, Why do people need drugs? (medical)

Real Project

This term Y3/4M will organise a Victorian banquet where children will be cooking different types of food and serving it to the visitors.

Year 3/4M

Summer Term Plan

Mission Statement

We put children at the heart of everything we do

Dear Parents/ Carers,

The Summer term in Y3/4M will be full of exciting opportunities. As well as introducing our new topic: Victorian Britain, we also have our residential visit booked for this term. We will focus on a new class text, Scabbajack, and we will explore the Victorian History through art, DT and French. Towards the end of this term, you will receive a report which will provide details of your child's current assessment levels, their progress over the year and their targets for moving into Year 4 and 5.

We are really looking forward to the Summer Term!

Thank you,

Miss Mills (Class Teacher)

Miss Mason (Teaching Assistants)

Mrs J Cook (Head Teacher)

Mrs. J.K Fearnley (Exec. Head Teacher)

Literacy

Lots of our writing will be based on our class text and we will be developing our skills in researching and organising information to create non-chronological reports, diary entries from the characters perspectives and creating nursery rhymes.

Numeracy

This term, we will be investigating money, linking this to history to see how our currency has changed over the years. We will also revisit strategies for multiplication and division.

Science

Our science topic will be focused mainly on rocks and soil. Using investigations and hands on activities, we want to find out and investigate all about the different rocks and soils and how our Earth is made up.

French

Firstly, we will expand our French vocabulary by looking at how to say different foods in french. Then we will recap the French we have learnt over the year.

ICT/ Computing

In ICT, we will be further developing our skills in computing using programmes such as 'Book Creator' and 'Purple Mash' to create emails. We will also be using the internet safely for lots of our historical research. Then using iPads and other technology, the children will be creating a silent Victorian movie by applying the skills learnt in ICT.

Design Technology/ Art

In art, we will be learning new skills such as sewing, using clay to create Victorian items, weaving and many other exciting materials. This term we will also be looking into the artist called William Morris where we will recreate some of the art.

RE

Our studies in Religious Education will be based around the Islamic faith this term.
